---

### JOB DESCRIPTION

A broad ESG and sustainability consulting role. This person will be responsible for auditing, consulting on and implementing improvements to client operations to help them towards net zero and embrace the circular economy.

Carbonbit is committed to helping develop a sustainable world. We design innovative, sustainable solutions, that minimise the use of natural resources whilst helping clients achieve their sustainability ambitions. The successful candidate will join us at a crucial stage in our development and be a significant contributor to the growth of the firm. A competitive salary and appropriate career progression is on offer.

#### KEY RESPONSIBILITIES:

- Help shape strategy for the services delivered to ensure that we remain at the forefront of the sustainability industry
- Further enhance existing very strong client relationships and promote / develop new and existing services to clients
- Responsible for delivery of sustainable building certifications, TCFD and SBTi planning, ethical audits (SMETA), Net Zero Strategies, circular economy plans and associated ESG reporting
- Coordination of frameworks, bids and sub-contractors
- Preparation of Scope 1, 2 and 3 GHG Inventories
- Foster an environment of innovation, customer service and continuous improvement
- Be willing to continue professional training and development

#### KEY PERFORMANCE INDICATOR AREAS:

- Superb delivery of the services and projects resulting in the meeting of and wherever possible, exceeding client expectations
- Communicate timely, accurate management information and solutions
- Collaborate effectively with internal / external team members in a flat structure
- Provide regular opportunity analyses to help shape the company direction and strategy
- Help drive profitable revenue growth as an integral part of the company's future plans

## Person Specification

### IDEAL KNOWLEDGE, SKILLS & ABILITIES

- Understanding of optimisation, digitalisation, and smart technologies around organisational sustainability
- Strong knowledge of practical implementation of ESG / Net Zero / TCFD frameworks
- Strong understanding of the nature, drivers and trajectories of climate change and associated mitigation strategies
- Offer consulting support to clients in their environmental and development challenges across a range of risks, technological innovations, investment opportunities and policy responses
- Develop skills to provide a pathway for organisations to adopt scalable progress toward net zero and sustainable development
- Good knowledge of carbon footprinting and life cycle analysis - working with carbon accounting standards (ISO 14064, GHG Protocol and its variants, PAS 2050) and understanding of carbon neutrality standards such as PAS 2060

### IDEAL QUALIFICATIONS AND EXPERIENCE

- Hold at least a 2:1 at Degree and ideally a Master's or advanced Professional qualification in M&E design consulting or Sustainability Consulting
- High level of commitment and an independent, conceptual working style
- Ability to quickly understand complex problems and develop solutions
- Superb written and oral communication skills
- Existing qualification or willingness to further qualifications (e.g. CEng or CEnv or CEM)
- Enjoys developing new concepts in collaborative environment
- Willingness to travel/flexibility to work on international projects
