

The countdown to ESOS Phase 3 compliance has begun!

With the third ESOS deadline set for 5 December 2023, it is important to establish if your organisation needs to comply and then commence the energy audits, importantly extracting the full benefit of associated savings, with energy prices as high as they are.

Work with Carbonbit and our team of experienced accredited experts to ensure you meet Environment Agency requirements and achieve ESOS compliance. We will also assist in prioritising your range of energy efficiency and cost cutting opportunities identified in your ESOS report.

Wise Not To Wait!

It makes sense to start your Phase 3 journey now with our expert accredited Lead Assessors. It is highly likely that ESOS fees will increase closer to the deadline, so timely compliance makes commercial sense!

Fines for non-compliance can include an initial penalty of up to £5,000 and £500 for each working day of non-compliance; making a false or misleading statement could lead to fees of up to £50,000!

ESOS Phase 3

What Is ESOS?

The Energy Savings Opportunity Scheme (ESOS) is a mandatory energy assessment scheme, introduced by the UK government to ensure large enterprises in the UK are energy efficient. Under the scheme, large organisations are required to assess their energy usage every 4 years and this must cover transport as well as buildings and process energy use and to find new ways to save energy – we are currently in Phase 3 and the countdown to compliance has begun.

Does ESOS Impact My Organisation?

Your company or organisation must comply with ESOS if:

- You have over 250 members of staff, or
- A turnover of over 50 million Euros (£44.1m) or an annual balance sheet of over 43 million Euros (£37.9m)
- You are an overseas organisation with over 250 employees in the UK
- Your company is part of a larger organisation, which falls into any of the above

How We Can Help

Compiling and submitting your energy audit is a complicated process. We've already helped over 70 organisations complete assessments and often helping prioritise and deliver associated energy efficiency savings.

Why Carbonbit?

Carbonbit has worked on all Phases of ESOS with some of the UK's largest and most complex organisations. We believe in collaboration, working closely and empathetically with your internal teams to get the job done.
